

Hyperhydrosis

Post treatment instructions

Please do:

- Take Panadol or similar analgesic if you experience discomfort or pain following botox treatment.
- Be assured any tiny bumps will go away after a few hours
- Mild bruising may occur and last up to 1 week
- Make an appointment for follow-up review in 2 weeks

Please do not:

- Take Aspirin as this can cause bruising and bleeding
- Do vigorous exercise for 12 hours following injections
- Apply deodorant for 24 hours, this may cause an irritant skin reaction
- Massage the treated area, this may cause increased bruising
